# Fostering European Exchange: Transformations towards a sustainable and resilient future

Flood disasters and hydro-meteorological events are getting more severe all over Europe. In response to the recent flood events, this event will discuss how a transformation towards a resilient and sustainable future can be achieved.

This pre-event is jointly organized by the French Association for Natural Disaster Risk Reduction (AFPCN) the German Committee for Disaster Reduction e. V. (DKKV) and the Disaster Competence Network Austria (DCNA) to strengthen the European cooperation links and the exchange of expertise and best-practices. Panelists from DKKV, AFPCN, and DCNA will present lessons-learned and lessons-to-learn from recent disasters in their respective countries. Structured along three main questions it will be discussed how we can learn from past events and what transformations are required to achieve a more resilient future within Europe. In the end, the discussion will open up and questions from the audience are discussed by the panelists.

October 21st, 2021, 04:00 – 05:30 pm PRE EVENT by DKKV, AFPCN, and DCNA

### Prof. Dr. Reimund **Schwarze**

Head of the Department of Climate Economics at Helmholtz Centre for **Environmental Research** (UFZ) and board member at **DKKV** 

## Host Ronja Winkhardt-Enz

Research Associate at German Committee for Disaster Reduction (DKKV)

AFPCN was created in 2001 to continue the work of the French Committee of the International Decade for the Prevention of Natural Disasters. It links disaster prevention actors from research, politics and civil society.

DKKV is the national platform for disaster prevention in Germany and the intermediary to international organisations and initiatives active in the field of disaster prevention. Further it functions as a competence centre for all questions of national and international disaster risk management.

DCNA is Austria's knowledge network for disaster risk reduction and integrates existing scientific multi-disciplinary activities. It co-develops innovative solutions for current needs across the disaster risk management cycle. DCNA supports the translation and transfer of complex scientific data and provides evidence-based advice to decision makers of the public and private sector.

Please feel free to forward this invitation to your network! #FTKatV
